

Canyoing Reflection
By Lars Dobashi Nunes

The canyoning field trip was the best field trip that I had and want to do that another time.

My process to go down was that we need to think before you go what way is the safest because to be protected. You also need to look that the stone is not black or brown because you can slip on that stones.

My feelings on the beginning were really scared to start the canyoning. But in the middle of the canyoning I felt better and it felt not more scared. On the end (after) I felt really exited that I did it and it was really fun.

My positives were I don't fall in the water and that I learned to do that. Also I try to do it.

My problems were I was really scared on some parts of the river by the big stones.

Thank you for the exited field trip and it was really fun.

Sincerely,
Lars
